

# CMS Quality Registry Pricing

## Per Practice (Up to 15 Clinicians)

In 2022, CORHIO/Contexture was selected by the Center for Medicare and Medicaid Services (CMS) as a Qualified Registry (QR) for the fourth consecutive year. This designation allows us to collect and submit clinical quality data on behalf of eligible healthcare practices participating in the Quality Payment Program (QPP) and the Patient Care First program (PCF). **Among the services we provide through the QR:**

- Validation of data sources
- Helping practices understand measure definitions
- Reporting for the quality category Electronic Clinical Quality Measures (eCQM) by utilizing clinical care documents
- Reporting for measures in the Promoting Interoperability category
- Correcting inaccuracies in reporting
- Providing quarterly feedback reports for participating clinicians

## Annual Subscription Fees

	Quality Payment Program (QPP)	QPP – quality category only	Patient Care First (PCF)
Practices reporting up to 15 clinicians	\$19,500	\$16,500	\$12,500
Up to to 15 additional clinicians	\$7,500	\$6,000	\$4,000

Participation in the QR satisfies one the requirements for the CMS Merit-based Incentive Payment System (MIPS) program – one of two tracks offered by CMS to meet the requirements of the QPP.

Using our QR services can take the stress out of reporting quality measures for MIPS, QPP, PCF, Advanced Payment Models and other programs to help your organization reach its goals while improving outcomes for your customers and communities. It can also improve reimbursements, the integrity of data and may give practices bi-directional status for their Promoting Interoperability measure to support transitions of care.
